-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Election filed on 3/16/05 has been received.

Election/Restrictions

2. Applicant's election of Species A in the reply filed on 3/16/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
3. Claims 6, 10-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/16/05.
4. Applicants have stated that claims 6, 18 and 19 reads upon the elected embodiment. The examiner disagrees. These claims require a lattice structure which is not present in the elected figures. The cylindrical member of figures 1-3 is clearly shown as solid.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3683

6. Claims 1-5 and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Drewett (U. S. Patent no. 4,548,150) in view of Collier (U. S. Patent no. 6,406,221). Drewett discloses: impact absorption member E, flange 42, bracket 28,30,31, mounting member 19,20 and portions of sidewalls 26,27 which 19,20 pass through, notches 43,44, apertures at bolts 55.

Drewett does not disclose a cylindrical shape. Collier teaches a cylindrical shape. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a cylindrical shape as the vessel would encounter the same impact surface from any angle. This allows for the force to be absorbed in a consistent manner even if the vessel impacts from an odd angle.

Regarding claim 5, Drewett does not disclose the use of polyurethane. Collier teaches the use of polyurethane (see figure 6 column 5 line 5-26) It would have been obvious to one of ordinary skill in the art at the time the invention was made to use polyurethane as taught by Collier in the device of Drewett as material selection is merely a design choice. Collier discusses the advantages of Polyurethane in the cited section.

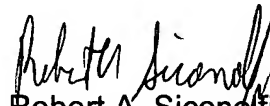

Regarding claim 3, Drewett does not disclose the use of lobes. The use of lobes is well known. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use lobes on the device of Drewett as such is merely a design choice.
